

# SECURE IOT MASSIVE DEPLOYMENT AND MANAGEMENT

WITH

Atrebo and Staex join forces to secure IoT operations.

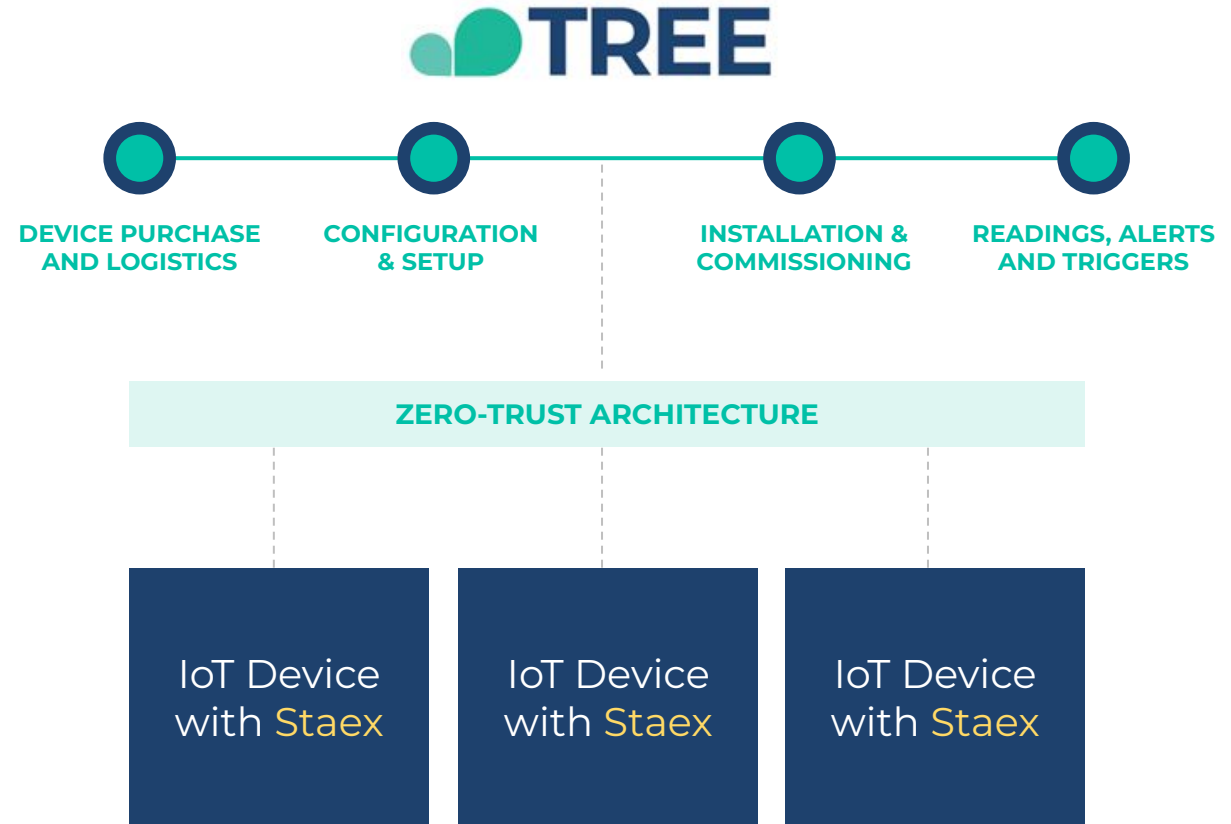

**Atrebo** is a specialised software development company that develops TREE, a solution for the digital transformation in critical infrastructure management. With more than 200.000 sites managed, Atrebo has been helping global companies achieve operational excellence for 13 years.

Atrebo helps **adopting IoT to anticipate incidents** on assets and infrastructure. Using remote monitoring, providing quality of service, and **improving the network availability while managing preventive and corrective maintenance, and collecting all the readings**. It takes care of the infrastructure hassles and enables the creation of any kind of application on top (e.g., smart infrastructure, smart parking, air quality, traffic, smart waste management...).

**Staex**, zero-trust network for IoT that allows IP cameras, electric vehicle chargers, and other devices and machines that cannot run a VPN to become part of the secure public network.

Staex reduces mobile data costs, **running on the smallest Linux-based devices with limited resources while using state-of-the-art cryptography to protect their mission-critical data**. This secure IoT-backed network enables businesses to build new revenue streams with other partners within days.

**Atrebo** and **Staex** are members of the **Tower Automation Alliance**.
